

Stop COVID-19 sickness reaching our communities

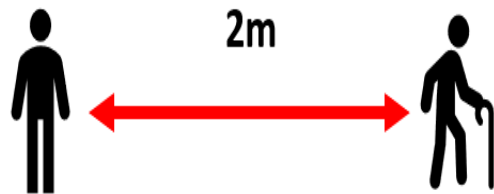

This sickness is passed around through coughing/sneezing and on our hands

This is a bad sickness that is no good. Especially for our old and sick people. We need to look after them so we don't lose them. We can stop it through:

- **No more hand shaking**

- **Stop long ways from everybody, especially the old people**

- **Wash your hands with soap for 20-30 seconds**

[Insert picture of community/town]

- **Stop one place for a while. Don't be moving around all the time**
